

Beulah Park Wastewater Treatment System

This drain field is in your care.

This drain field is a delicate part of an expensive wastewater treatment system that is paid for by the residents it serves.

Do: Enjoy the community green space for passive recreational uses like walking and sitting by Beulah Park residents.

Don't: Do anything that could puncture the surface of the drain field (like dig, drive stakes, wear shoes with cleats, play team sports, bike or plant anything). Grass has been planted on the drain field and is the best cover. King County mows the grass periodically.

Help keep ivy and other plants from invading the drain field. Keep the plants on your property under control and off the drainage field! Maintain vegetation to prevent encroachment of trees, shrubs and invasive weeds whose roots may clog the drain field.

Report problems. Odors, wet spots in dry weather or exposed pipes may be an early sign of a problem. Report any problems by calling the King County 24-hour plant emergency number at 206-684-2404.

Dog etiquette on the drain field.

If you let your dog on the drain field, be sure to scoop up the poop and dispose of it properly. Also, keep your dog from digging.

Thanks for helping to protect your community system.
